Budget - total amount	
Budget - amount requested from EF	
Duration (months)	

Project Title

		Non satisfying	Partially satisfying	Satisfying	Coefficient	Commentary
LETTER OF INTENT						
Geographic area	Geographical area(s) of implementation (or multicountry dimension, if relevant) are justified (i.e. urban area vs rural area)				1	
	The project geographic perimeter is clear and in line with known health issues				1	
Complementarity with programmes supported by the Global Fund	Complementarity with GF programmes in country is explained In country GF programmes are described : the coherence, relevance and complementarity between the project itself and the GF programmes in the country of implementation is justified and supported by argument.				3	
Objectives	Objectives are relevant, in line with the TOR and identified the needs				2	
Beneficiaries	Beneficiary selection is relevant according to their needs and consistent with the project's objectives				2	
Deployed strategy and methodology of intervention	Deployed strategy and methodology of intervention are relevant				3	
	HSS: an integrated approach across the pandemics is proposed (and not a vertical approach with an HSS component) . PV : The proposed strategy addresses the health access barriers for the well targeted beneficiaries.				3	
Capacity building	A clear capacity building approach for implementers and skill transfer for implementers from developed countries is part of the project				2	
Partnerships	The partnership approach already exists and the work plan is collectively designed and organised.				2	
ANNEXES						
Budget	The budget is consistent with the project				1
